THE EUROPEAN FORCES SWIM LEAGUE

The European Forces Swim League (EFSL) is an outgrowth of US and Allied armed forces community sponsored swim teams. The League was formed in the summer of 1975 because of a recognized need to provide an organized competitive swimming program for the dependent youth of armed forces and civilian component members stationed in Europe. This was, and still is, the principal objective of the League. It is not meant to be competitive with, nor draw participants from local or national European competitive swimming programs.

The original teams were Berlin, Heidelberg, Lahr, Mannheim, Patch and SHAPE. Since that time, the League has steadily increased its membership to 15 teams located in West Berlin, West Germany and Belgium. Swimming membership presently stands at 700 young people, in four competitive age levels; 10 and under, 11-12, 13-14, 15-19 years. Each level provides a stepping stone for a swimmer to progress to highest level of competition.

The League's first Annual Championship was held 16 April 1977. Since then, this exciting event has been the climax of the League's regular season. Again, this year approximately 400 participants will be competing in the Championship. It is expected that, as in past years, many excellent times will be established and several League records broken.

The League is proud of its past achievements in providing a successful program for the personal development of our young people. It recognizes the support and the efforts of swimmer parents without whose assistance these accomplishments could not have been achieved.

Finally the League remains dedicated to supporting the youth of the community through healthy competition.
